[a] The figures for 1841, as published in *Gazette*, are full of errors which cannot now be corrected, and should therefore be used with great caution.

[b] The figures (Persons) for 1847 include 2246 military, women, and children; also 3739 male convicts on public works.

[c] " " 1851 " 953 " " " " 568 convicts, sex not distinguished.

[d] " " 1857 " 630 " " "

[e] The discrepancy in the number of brick and stone houses in 1870 and 1881 arises from a large number of residents in country districts failing to give definite descriptions.

[Compiled by Government Statistician from Returns supplied by the Customs Department.]

* The corresponding numbers to and from, as ascertained by the Customs Departments of the various States, are so utterly irreconcilable that it has been deemed more desirable to take the departures as ascertained by our own Customs Department than to base the statement of migration upon the compilations prepared at State and Foreign ports of arrival or departure. Owing, however, to the completely insular character of Tasmania as a State, conclusions drawn in respect of increase or decrease to population are less liable to error than similar conclusions drawn in respect of each State of Continental Australia. As regards migration seaward, it must be borne in mind that it is more than probable that the figures given independently by each State are equally and indefinitely erroneous within certain limits, and therefore it is unwise to assume that the differences shown between the statements of two States afford any reliable index to either the extent or direction of the divergence from the truth.

† Estimated to be understated by about 12½ per cent

[a] In this table deaths occurring in the Public Hospitals in Hobart and Launceston are referred to the district in which the cause of death originated. [b] This District embraces the New Town Charitable Institution, in which aged persons from all parts of the State are assembled. [c] Deaths occurring at sea or on board foreign ships in port have not been included. [d] Preventable causes embrace deaths at all ages from all causes excepting those classified as due to "Senility" or "Old Age." [e] Corrected for changes in age distribution. [f] Indicates deaths under 1 year per 1000 births. [g] Computed in accordance with the recommendation of the Conference of Statisticians at Hobart, January, 1902, viz.—That the Age-Groups be—Under 1 year, 1 to 20 years, 20 to 40 years, 40 to 60 years, 60 years and over; and that the Population of Sweden (Census 1890) be taken as the Standard. [h] The detailed rates for these divisions are omited, as the fluctuations between single years when numbers are small give unsatisfactory results.

TRADES, MANUFACTORIES, AND OTHER INDUSTRIES.

WITH regard to the following industries, the aggregates are alone given, as it would not be desirable to localise information to Districts, thereby in many cases unnecessarily disclosing the extent of the business of private individuals or companies, as the case may be.

Unfortunately, the figures given by some establishments in respect of capital invested vary greatly year by year; such figures can therefore be only regarded as rough approximates.

* Exclusive of Fruit Depôts connected with Jam Manufactories. The various Manufactories are all situate in Hobart or its vicinity. † From figures supplied by Commonwealth Statistical Department. ‡ Based on declared average price of Exports per lb. ‖ These figures in the absence of any reliable knowledge of Stocks in hand at the close of each year merely indicate the balance between local Manufactories and Imports, and the figures relating to Exports ¶ Probably the difference of the balances of Stock on hand may reconcile the anomalies of local consumption of Jams and Pulp in each of the separate years, and especially as regards the years 1902 and 1903. The true measure of local consumption, free from such disturbance would average about £2,798,175 for the five years ending 1904. *Included fruit-drying establishments. § As per returns furnished.

* The exact particulars as to mileage in some cases cannot be ascertained, as the responsible officers in many instances do not exercise sufficient care in supplying information under this head. † By Act 48 Vict. No. 28, Section 64, the amount of Rates in the £ on Crown land is fixed at one-half of that on private property. Blanks indicate that no transactions took place this year. ‡ Figures for previous year so far as mileage, &c., is concerned.

The sign *minus* (—) shows that the Balances were against the Trusts.)

* Represents 58·79 per cent. of the total Public Debt of the six States for all purposes (£243,335,489).

‡This Profit on Working (£6,290,887) not only exceeds the Interest Burden on borrowed money invested in State Railways (£143,052,775) by £1,15[illegible],784, but itself represents and covers 72·56 per cent. of Interest Burden on the total Public Debt of the Six States for all purposes.

The advantages of working the 14,467 miles of Railway to the Six States, regarded from an economic and industrial point of view, are estimated to represent a present capital value of £865,580,057, *i.e.*, 3·55 times greater than the present capital value of the whole of the existing Public Debt of the Six States of the Commonwealth.

COMMONWEALTH AND STATE FINANCE.

Statement showing the Relative Magnitude of Commonwealth and State Functions and Obligations.

An adequate comprehension of the financial problem connected with the present method of returning a "Federal Surplus" to the several States cannot successfully be arrived at by anyone who does not attempt to realise the magnitude of the duties, functions, and obligations which remain to be discharged by the States and Commonwealth respectively.

The best index of the relative importance of the duties, functions, and obligations that remain to be discharged by the several States, as compared with the functions and obligations transferred or otherwise deputed to the Commonwealth, is to take the respective cost of government as a gauge; thus—
